Vehicle Make	Vehicle Model	Vehicle Year	Model Number			Availability	Notes	Extra Information			SEE NOTE BELOW
								Uses Complete Factory XM System & Antenna	Can Use Factory XM Antenna W/ Kit & Adapter	Compatible With Factory Backup Camera	
Mazda	Mazda 3	2010 - 2013	OMZ31	i	7	November					
	Mazda 6	2008 - 2013	OMZ61	i	7	November					
VW	BEETLE	2012 - 2013	OVW1	N	7	Current	Now Fully Compatible with Fender Amplified Systems except for VIII Audio System				
	CC	2009 - 2013	OVW1	N	7	Current					
	EOS	2007 - 2012	OVW1	N	7	Current					
	GOLF	2012 - 2013	OVW1	N	7	Current		Not Compatible with Premium VIII touch screen sound system with HD Radio in all models of cars			
	GTI	2006 - 2013	OVW1	N	7	Current	Not Compatible with DynAudio or 6 Disk Changer Systems				
	JETTA	2007 - 2013	OVW1	N	7	Current					
	JETTA SPORTWAGON	2009 - 2013	OVW1	N	7	Current					
	PASSAT	2006 - 2013	OVW1	N	7	Current		USE CAUTION REMOVING RADIO TRIM			
	ROUTAN	2012	*** OCH1 ***	i	6.5	Current	SEE TECH TIP ON XM INSTALLATION AT AUDIOVOXUNIVERSITY.COM	USE CARAVAN FIRMWARE FOR OCH1 IN ROUTAN			
	TIGUAN	2008 - 2013	OVW1	N	7	Current					

NOTE: ALL Advent Navigation Systems are designed to replace NON-Navigation OEM Audio systems. Factory Navigation Systems often have different connections, CAN connectivity, and are not compatible with Advent OE Solutions.

Installation Notes

XM Tuner For All Models		CNP2000UCA	MUST ORDER BOTH - MUST BE PROGRAMMED PER INSTRUCTIONS INCLUDED
XM Direct Connection Cable required with CNP2000UCA		CNPJEN1	
Toyota XM Ant Adapter - Allows CNP2000UCA to use OEM Antenna		1124153	
Toyota USB Port Media Link - Fits Factory location in all		32813570	
iPod Cable Required for iPod Video		JLINKUSB	

GM Specific Notes

OGM1 Works with Factory GM XM tuner or CNP2000UCA Tuner from XM. Program with each models specific flash on XMDirect. Must use XMDirect version 3.3 or later ONLY! Always uninstall previous versions of XMDirect before downloading the new Flash utility.	Advent OGM1 - Works with Bose and Non-Bose equipped Vehicles - NOT COMPATIBLE WITH CENTER POINT SYSTEMS - SEE BELOW:	OGM1 Works with all current GM Functions, Warnings (Except LDS), Side Blind Zone Alert (SBZA), OnStar, OnStar Navigation Voice Turn By Turn, Factory Bluetooth, Overhead Rear Video and Rear Seat Audio. Note: Cannot change XM station from Rear Seat Audio controls. All other RSE controls operate as normal. GM OnStar contains the GM Bluetooth. This remains working in all GM cars. The steering wheel controls in GM will continue to operate the GM Bluetooth, not the Advent Bluetooth. This is normal and cannot be changed or the OnStar system could not be controlled. The Advent Bluetooth can be used by utilizing the on screen controls.

GM Centerpoint systems: The OGM1 is not designed to work with the GM Centerpoint system. The easiest way to identify this system is by the center channel dash speaker. The factory radio may also have the DTS logo on the front of the radio. If you install a OGM1 into a Centerpoint equipped vehicle you will get no sound from the radio. This is normal and due to the fact that they are not compatible. There is nothing wrong with the radio. The vehicle may also show the code UQA on the trim/options tag in the glove box.

*1: All OGM1 radios now include a rear seat video harness. For REAR SEAT VIDEO in some older vehicles that were equipped with a Panasonic Overhead with a DVD loader, a PAC OS-4 or equivalent Adapter is required. Recommend contacting PAC or Metra for the latest part number. GM Wireless Remote control does NOT work with the OGM1.

*2: Acadia with "Cargo Area Audio Controls" - Not compatible with these controls - Comes in Technology Package

*3 For Older GM Vehicles with NON CAN Backup Camera, use Metra adapter part # BACKUPCAM

*4: On Hyundai with the Infinity Sound System - Radio will activate amplifier, use AMP ON/OFF adjustment, same as OGM1 Bose Adjustment . See tech update at audiovoxuniversity.com for more information - Bose amplifier setting.

*Notes: Steering Wheel Controls May Operate Differently Than On The OEM Radio That Has Been Removed Due to Added Features And Functions - This is covered in the owners manual for the end user.

OEM USB/AUX input jacks are not compatible with Advent OE Radio's. Most are not capable of charging iPhones or iPods at 1amp and do not have Video inputs. The Advent OE Radio Media Link is high speed USB 2.0, charges at 1amp and allows Video playback from iPhone/iPod (when using the correct cable) or supports Aux in from DVD players and other video devices.

If any discrepancies are found please advise immediately. All vehicles are subject to change based upon trim model, local special accessory kits offered by the manufacturer, and or dash color being changed without notice. AVX can not be responsible for these changes but will react to meet these needs as quickly as possible.
